

BROW AFTERCARE

- ✓ Do not apply make-up or receive any other eye treatments for at least 24 hrs.
- ✓ Keep dry and avoid swimming/sauna for 24 hrs.
- ✓ Use an eyebrow conditioner daily.
- ✓ Avoid touching the eye area after treatment. Touching can add oils to the area (from fingers/hands) which can result in spots.
- ✓ Avoid tweezing between appointments to maintain shape.
- ✓ Do not apply Retin-A, AHA, or exfoliate for 3 days before or after.
- ✓ Do not use self tanning products for 24-48 hours before or after.
- ✓ Tinting will be darker and more defined immediately after. Oil-based make-up remover can cause tint to fade faster.
